Professional Summary

AI-focused Computer Science undergraduate preparing for **Generative AI internships**, with strong hands-on experience building **LLM applications, RAG workflows, multimodal tools, and agentic prototypes**. Built a portfolio of **10+ GenAI projects** spanning resume intelligence, educational AI, healthcare-oriented assistants, content generation, and conversational analytics. Brings a strong builder mindset backed by **Top 8 at IISc Bangalore OpenHack 2025 (out of 2000+ teams)**, **500+ LeetCode problems solved**, and consistent public learning across ML, DL, CV, NLP, and modern LLM tooling.

Education

IIIT RGUKT Nuzvid

2023 – 2027

B.Tech in Computer Science and Engineering

CGPA: 9.2/10

PUC (Intermediate), RGUKT

CGPA: 10/10

Technical Skills

Languages: Python, C++, SQL

Generative AI: LLM application development, Retrieval-Augmented Generation (RAG), prompt engineering, Gemini API integration, LangChain, vector stores, semantic retrieval, multimodal workflows, AI agent patterns

ML / AI: Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, representation-focused modeling, scikit-learn, PyTorch

Frameworks / Tools: Streamlit, Flask, FAISS, SQLite, Tesseract OCR, Git, GitHub, Jupyter

Core CS: Data Structures and Algorithms, DBMS, Operating Systems, Computer Organization and Architecture

Problem Solving: 500+ LeetCode problems across arrays, graphs, trees, dynamic programming, and greedy patterns

Selected Projects

AI-Based Blood Report Parser

IISc Bangalore OpenHack 2025 – Top 8/2000 Teams

Python, LangChain, OCR, LLM APIs, SQLite

- Built an end-to-end AI pipeline to parse heterogeneous blood reports and convert noisy medical documents into structured, usable medical data.
- Combined **Tesseract OCR**, LangChain-based orchestration, structured extraction logic, and LLM-assisted interpretation to improve report understanding from complex inputs.
- Added abnormality detection and longitudinal health-trend analysis, turning raw extraction into actionable clinical-style insight generation.
- Delivered a working prototype strong enough to contribute to a **Top 8 finish among 2000+ teams** at IISc Bangalore OpenHack 2025.

Project Sadhana: GenAI Adaptive Quiz System

Generative AI Learning Platform

Python, Streamlit, LangChain, FAISS, Gemini

- Built a multi-page GenAI learning application that ingests study PDFs and supports **PDF chat, MCQ generation, Q&A workflows, and learner-facing evaluation**.
- Designed retrieval-backed quiz generation using document chunking, embeddings, FAISS vector storage, and prompt-driven question creation.

- Implemented both topic-specific and general assessment flows, including semantic descriptive-answer evaluation for richer and more personalized feedback.
- Positioned the project as a complete educational AI experience rather than a one-off prompt demo, showcasing product thinking alongside technical implementation.

ATS Using Gemini

Multimodal Resume Intelligence Application

Python, Streamlit, Gemini Pro Vision, pdf2image

- Developed a multimodal ATS-style application that compares resumes against job descriptions and returns match analysis, missing keywords, and final fit feedback.
- Converted uploaded PDF resumes into image inputs and used **Gemini Pro Vision** for resume understanding, critique generation, and candidate-fit evaluation.
- Built an interactive Streamlit workflow that demonstrates practical GenAI application design around a real user problem: resume improvement.

WhatsApp Chat Analyser

Conversational Analytics Project

Python, Streamlit, NLP, Data Visualization

- Built a conversational analytics application to extract trends, sentiment cues, and messaging behavior insights from exported WhatsApp chats.
- Engineered preprocessing logic for more reliable handling of timestamps and heterogeneous export formats across different chat sources.
- Generated interactive analytics views that surface communication patterns, user behavior, and temporal engagement insights in an accessible way.

Additional GenAI Portfolio Work

- **AI News Generation:** agentic workflow for AI-focused news drafting, trend summarization, and publishing-flow exploration.
- **Blog Generation:** AI-assisted long-form blog drafting and structured content-generation workflow design.
- **Disease Diagnosis Dhanvantari:** healthcare-oriented RAG exploration for diagnosis support and knowledge-grounded response generation.
- **Med Triage Agentic AI:** agent-style medical triage assistant exploring structured symptom collection and specialist-routing flows.
- **HYBD CMR EdTech:** education-focused retrieval and curriculum-aware content-generation workflow.
- **Stance Detection:** LLM-assisted reasoning workflow for stance analysis and topic interpretation.

Experience

NullClass Technologies

Jan 2024 – Feb 2024

Data Science Intern

- Worked on computer vision and deep learning projects involving experimentation, model training pipelines, and implementation-focused workflows.
- Strengthened practical understanding of data preparation, model iteration, and production-minded experimentation in applied AI settings.

Teachnook

Aug 2023 – Jan 2024

AI Intern

- Built a sentiment analysis chatbot and explored ML/DL workflow design through internship-driven AI projects.

- Gained hands-on exposure to practical AI implementation, experimentation, and deployment-oriented thinking early in the learning journey.

Achievements

- **Top 8 Finalist** – IISc Bangalore OpenHack 2025, selected from **2000+** teams
- **1st Prize** – Branch Project Expo
- **2nd Prize** – Mega Expo TechFest
- Solved **500+** Data Structures and Algorithms problems on LeetCode

Learning and Research Focus

- Built structured public learning tracks across **Generative AI, AI Core, MLOps and Deployment, Data Foundations, NLP, DSA, and Programming/Math Foundations**
- Current interests include **Large Language Models, RAG systems, agentic AI workflows, multi-modal applications, applied AI in healthcare, and ML systems**

Certifications and Additional Information

Certifications: AI Internship Certification – Teachnook; Data Science Trainee Certification – NullClass Technologies

Languages: English, Telugu, Hindi
